

WHAT CONDITIONS CAN BE AFFECTED BY NUTRIENT STATUS?

- Diabetes
- Fatigue
- Mood Disorders
- Weight Management
- Sports Nutrition
- Osteoporosis
- Cardiovascular Disease
- Migraines
- Women's Health
- Hypertension
- and many other common conditions

There is overwhelming evidence that vitamin deficiencies are associated with the chronic disease process and the overall condition of one's health.

TEST COMPONENTS:

VITAMINS

Vitamin A
Vitamin B1
Vitamin B2
Vitamin B3
Vitamin B6
Vitamin B12
Vitamin C
Vitamin D
Vitamin K
Biotin
Folate
Pantothenate

MINERALS

Calcium
Magnesium
Zinc
Copper
Manganese

AMINO ACIDS

Asparagine
Glutamine
Serine

SPECTROX™

FOR TOTAL
ANTIOXIDANT FUNCTION

ANTIOXIDANTS

Alpha Lipoic Acid
Coenzyme Q10
Cysteine
Glutathione
Selenium
Vitamin E

CARBOHYDRATE METABOLISM

Chromium
Fructose Sensitivity
Glucose-Insulin
Metabolism

FATTY ACIDS

Oleic Acid

METABOLITES

Choline
Inositol
Carnitine

IMMUNIDEX™

WHY IS NUTRIENT STATUS IMPORTANT?

Vitamin, mineral and antioxidant deficiencies have been shown to suppress the function of the immune system which can contribute to degenerative processes such as arthritis, cancer, cardiovascular disease and diabetes. You may be deficient in some vitamins, minerals, antioxidants and/or other essential micronutrients and not even know it.

University research shows that 50% of people taking multivitamins are still nutritionally deficient.

STANDARD TEST RESULTS DO NOT MEASURE IF THE NUTRIENT IS PROPERLY FUNCTIONING WITHIN THE BODY.

SpectraCell Laboratories developed their exclusive, patented micronutrient testing to measure the function of selected vitamins, minerals, antioxidants and other essential micronutrients within your white blood cells. Analysis can reveal a person's functional nutrient status over a much longer time period than conventional serum testing. SpectraCell's tests give a more meaningful measurement of nutritional status than all other nutritional testing.

But I eat a balanced diet, exercise and take a multivitamin...

If this describes all or part of your lifestyle, read on. Many people lead healthy lifestyles, yet some individuals still have deficiencies. Why?

BIOCHEMICAL INDIVIDUALITY

Because each of us is metabolically and biochemically unique, the micronutrient requirements for one person may be quite different than the requirements of another.

ABSORPTION

Although you may eat a balanced diet, if you do not absorb vitamins, minerals, antioxidants and/or other essential micronutrients properly, you can have deficiencies.

CHRONIC ILLNESS

Health conditions such as arthritis, cancer, cardiovascular disease, diabetes, fatigue and multiple sclerosis, to name a few, can be affected, directly or indirectly, by micronutrient deficiencies.

AGING

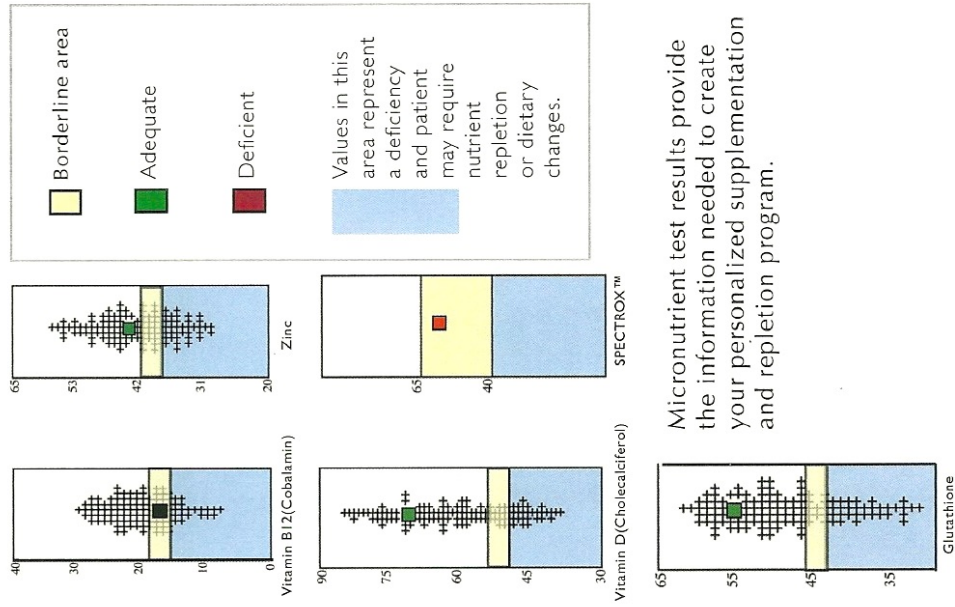

Our micronutrient requirements at age 30 are quite different from our requirements at age 40, 50 and beyond. Absorption difficulties, especially of vitamin B12, quite commonly occur as we age.

LIFESTYLE

Excessive physical activity, prescription drugs, smoking, alcohol and sedentary habits all impact micronutrient demands.

Sample Results

Micronutrient test results provide the information needed to create your personalized supplementation and repletion program.
